

YOUR CHILD HAS UNIQUE NEEDS.

*Their support should
be just as one of a kind.*

Families experiencing difficulties due to mental health challenges can struggle to find support that meets their needs. At times, youth are placed out of their home in residential treatment facilities, psychiatric hospitals, juvenile justice facilities, or daytime programs taking them out of their home communities. Despite best intentions, services can be difficult for families to access, coordinate, and understand.

When You Don't Know
Where to Begin —
That's Where We Come in

SERVICES ARE FLEXIBLE TO YOUR SCHEDULE AND FREE OF CHARGE

You will never pay a dime for Connected Families services. We are committed to providing family-led support that fits your schedule and respects your family values.

FAST Forward/Wraparound

Behavioral Healthcare Support for Ages 6 to 21

- FAST (Families and Systems Together)
- Individualized
- Guided by underlying needs
- Strengths and outcomes-based
- A collaborative, team-based process

Early Childhood Wraparound

Support for Ages 0 to 5

We are your guides, your allies, and your support system. We'll help you and your family identify your strengths and your most urgent needs to develop a long-term plan to improve mental health outcomes for you and your child. Our program is family-led and founded on unconditional care. What's important to you is important to us.

TrECC

Transitional Residential Enhanced Care Coordination

Families with children age 0 to 21 who are transitioning out of residential care or psychiatric hospitalization can struggle to find guidance that meets their unique needs. Services can be difficult for anyone to access. Our goal is to help your family through this transition.

BrECC

Brief Enhanced Care Coordination

BrECC is a short-term, family-driven, and youth-guided care coordination service designed to quickly connect families with the supports they need. BrECC is not meant to replace long-term services — instead, it bridges the gap. As families build confidence and understanding, they may transition into Wraparound care if needed.
